## MASTER

### Global Entrepreneurship, Economics and Management

#### A short description

The main aim of the Master is to deliver theoretical and technical knowledge in economics and business research with analytical and quantitative tools, integrating theoretical knowledge with its application to real economic problems. Taught completely in English, it offers fields of specializations in areas of Entrepreneurship & Business (with emphasis of innovation) as well as Applied economics. The specialised and multi-disciplinary nature of innovation process within the area of finance and management demands skills that are essentially based on statistical, mathematical and financial knowledge, but that also require a good understanding of accountancy, economics and the law.

#### Specific objectives

1. To offer an innovative mix of fundamental and applied training in order to provide graduates with essential knowledge of academic economic research, as well as specific expertise and skills related to the practice of entrepreneurship.
2. To provide the theoretical and interdisciplinary training necessary for the practice of business research
3. To emphasize the application of knowledge by concentrating on research work and by providing a practical focus for research outputs.
4. To train students in modern IT and software in order to help them develop skills in using historical data in a professional setting.
5. To introduce active learning methods (project and team work) into the learning process, as well as research seminars, master classes and internships of an international standard. The programme aims to combine academic studies and research by organizing regular seminars and involving students in projects conducted by the East European Center for Research in Economics and Business (ECEB).

The course offers the opportunity for double degrees and student exchange programs. In particular, the GEEM is characterized by:

- A double degree program with the University of Bordeaux, France
- A double degree program with the Università degli Studi di Sassari, Italy

**Job opportunities:** a solid track for Phd programs, researchers, lecturers as well as positions within multinational companies with R&D department
